

Geotab GO Anywhere Plus Asset Tracker

For fleets managing any asset, anywhere.

Stop Losing Money on Untracked Assets.

Start with GO Anywhere Plus.

Are you tired of the costly cycle of lost productivity, frustrating delays from misplaced equipment, and financially damaging low utilization rates? For too many fleets, the lack of true real-time visibility is the bottleneck crushing profitability.

That is why we built the GO Anywhere Plus asset tracker. Fully integrated into your existing Geotab platform, GO Anywhere Plus gives you a singular, powerful solution to end your visibility issues across every asset—from trailers and containers to generators and heavy construction equipment.

GO Anywhere Plus is purpose-built to deliver the detailed utilization insights you demand, flawlessly manage your mixed fleet, and provide future-proof solutions for sensor integration. Stop guessing where your capital is, start maximizing it with GO Anywhere Plus.

Why Geotab?

Cost Effective Asset Management

Take control of your bottom line and protect your investment. GO Anywhere Plus provides accurate and up to date location and status, drastically reducing the need to replace or rent expensive equipment. Use precise asset data to optimize resources, eliminate unnecessary expenditures, and maximize profit.

Operational Efficiency & Awareness

Stop guessing and start knowing exactly where your assets are with reliable, accurate location updates. We help you maximize utilization by turning asset usage into actionable insights. This empowers you to gain strategic control over operations and make smarter, data-driven decisions.

Built on Geotab Expertise

GO Anywhere Plus is an end-to-end solution built on Geotab's proven innovation in telematics. Experience seamless integration with simplified setup onto the unified MyGeotab platform, giving you one powerful view of both your vehicles and assets.

Key Features

Built for the Toughest Jobs

IP67/69K certified for all-weather protection and operates in temperatures from -40°C to +85°C (-40°F to +185°F).

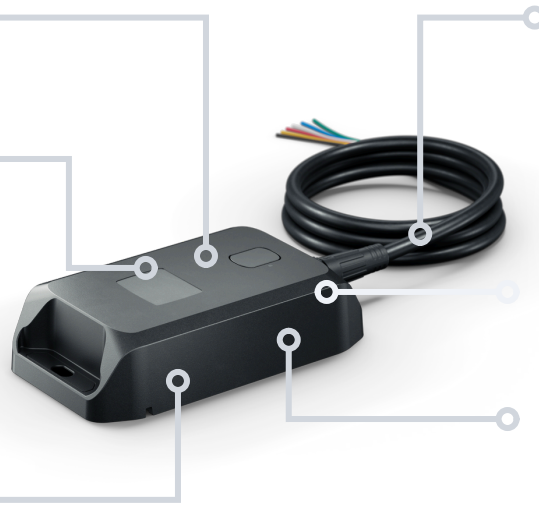

Always Connected, Anywhere

Offers global deployment models and satellite communication to maintain visibility even in remote, off-grid areas*.

Precise Tracking, Swift Recovery

Flexible reporting modes balance battery life and data, and a High-Frequency mode accelerates asset recovery.

*select carrier partners,

Know More than Just Location

Monitor ignition and engine hours for preventative maintenance.

Built to Last, Easy to Maintain

Engineered for 3–5 year life with easy, field-replaceable batteries or wired configuration, and simple screw or magnet installation.

One Platform for Your Entire Operation

Manage all vehicles and assets within MyGeotab's single dashboard using powerful analytics and alerts.

GO Anywhere Plus Modes

Configurable modes deliver relevant insights based on your unique needs.

Time Based

Reports fixed location updates at set times, regardless of motion, ideal for stationary assets.

High Frequency

Provides frequent location updates (every 15 minutes) for critical, high-visibility tracking needs, but drains the battery quickly.

Movement Delayed

Logs trip data while moving and uploads all data daily, maximizing battery life.

Movement Immediate

Reports location dynamically when movement is detected and reduces reporting when stationary, suitable for intermittently used equipment.
